Mounting Base Dimensions

Steps for Installation:

1. Make sure that the electrical circuit is free of voltage (master switch off)
2. Remove screws from front of fitting and remove covers.
3. Connect the cable - Connect live and neutral wire.
4. Install base plate to wall in desired location using appropriate screws for application.
5. Seal all holes including cable entry and around screws
6. Fitting is preset to 3000k, to change slide switch located on front of PCB to desired colour temperature.
7. Reattach covers to base plate making sure screws are tight to avoid any water penetration.
8. Apply silicon around edge of fitting to prevent any water from getting inside to electrical connections.
9. All connections must be carried out carefully, inspect all contacts before switching back on the electric circuit.
