### Steps for Installation:

1. Make sure that the electrical circuit is free of voltage (master switch off)
2. Loosen allen screws from side of fitting and remove cover.
3. Connect the cable - Use wire with earth; connect the earth first, then live and neutral wire.
4. Install base plate to wall in desired location using appropriate screws for application.
5. Seal all holes including cable entry and around screws
6. Fitting is preset to 3000k, to change slide switch located on front PCB Panel to desired colour temperature.
7. Reattach fitting to base plate making sure allen screws are tight to avoid any water penetration.
8. Apply silicon around edge of fitting to prevent any water from getting inside to electrical connections.
9. All connections must be carried out carefully, inspect all contacts before switching back on the electric circuit.
