- All o-rings and seals must be in place correctly to maintain warranty
- This form may be updated at any time due to product improvements, please check online installation form for most current version.

Steps for Installation:

1. Make sure that the electrical circuit is free of voltage (master switch off)
2. Remove bracket from canopy and by removing screws on side and set aside
3. Install bracket in desired location using appropriate screws for application.
4. Adjust cable length and cut off any excess.
5. Connect the cable: Use wire with earth, connect earth first then positive and then neutral
6. Reattach canopy to bracket by reinserting screws making sure these are tight.
7. Fitting is preset to 3000k, To change slide switch on top of fitting to desired colour temperature
8. All connections must be carried out carefully, inspect all contacts before switching back on the electric circuit.

Must be installed by a licensed electrician
