**Our COB (Chip-on-Board) strip lights come with some cool features. First off, they offer excellent colour mixing, producing a smooth and uniform light output. The compact design of COB LEDs allows for high power density, making them quite bright despite their small size. They're also energy-efficient, providing good lumens per watt. Plus, the closely packed LED chips result in a high-quality and focused beam of light. Overall, COB strip lights are like the superheroes of the lighting world—compact, powerful, and efficient!**

- 4000K Natural White is measured at 160lms and is for decoration purposes
- COB RGB+W LED strip (adjustable temperature)
- Size: 12mm (W) x 2mm (H) x 5000mm (L)
- 560 LED chips per metre
- Maximum Length: 5 metres
- Cutting Increments: 50mm
- Beam Angle: 120 degrees
- High quality self-adhesive 3M tape fitted to the rear side of the strip

## APPLICATIONS

- Under Cabinet Lighting: Illuminate kitchen countertops for both functionality and style.
- Cove Lighting: Conceal strips in coves for indirect ambient lighting along walls or ceilings.
- Accent Lighting: Highlight features like artwork or furniture for a touch of drama.
- Bedroom Headboard Lighting: Create a cozy atmosphere with strips behind the bed's headboard.
- Shelving or Bookcase Lighting: Showcase your collections by placing strips along or behind shelves.
