INTEGRATION

Entertainment

The Entertainment Handset is designed to have anti-microbial and water-proof features. The handset is rated at IP67 which makes it water-proof and dust-proof. It allows the user to have access to all entertainment functions whilst in bed, such as Volume Control, Change Channel, Nurse Call and Activate Bed Light.

With its aesthetic and lightweight design, yet durable construction, the handset feels great to grip and is easy to use. The blue silicone jacket makes the handset more hygienic, therefore making it easy to grip and soft to the touch.

The Entertainment Handset pairs with the Entertainment Socket and is also compatible with most existing systems in the industry.

Order Code

Product Code	Description
AX-550	Entertainment Handset
