

6 WAY 2 USB OUTLET POWERBOARD

This handy powerboard has 6 power outlets in a slim, sturdy design. Two of the outlets are spaced so that a bulky battery charger, power pack or transformer can be accommodated comfortably.

The powerboard also provides surge and overload protection to downstream appliances. Typically devices protected include audio, video, entertainment and computer equipment.

More importantly from the feature point of view, this unit comes with two (2) USB outlets. The USB outlets are very handy in charging or powering the ever growing devices that either come with USB port/s or have cables that adapt to a USB port.

Supported devices include MP3 players, hand phones, smart phones, PDAs, GPS', Bluetooth and computer tablets.

The powerboard also comes with a convenient 1m length power lead with a right angle power plug. The right angle plug, requiring less space, can easily and neatly fit behind furniture.

FEATURES

- Six Australian power outlets
- Surge and overload protection
- Two USB outlets for charging and powering USB devices
- 1m power lead with right angle plug

PB6USB2
